1. Project Brief

StreetSmarter is a student-led civic literacy initiative providing free workshops and resources to Indian teenagers. The website serves two purposes: (1) A public-facing hub for educational guides (Learn section) and impact tracking, and (2) A recruitment and fundraising portal for trainers, volunteers, and donors (Contribute section).

This is an upgrade to the existing site (currently live at www.streetsmarter.in).
Admin Login Password: streetsmarter2026

2. Brand Theme & UI

We are shifting to a Dark Blue and Yellow color palette. Please use the following exact hex codes:

Primary Dark Blue (Backgrounds, Navbar, Headings): #0A1B3F (Deep Navy)

Secondary Yellow (Buttons, Highlights, Links): #FFC107 (Vibrant Amber)

Text on Dark Blue: #FFFFFF (White) for body text, #FFC107 for emphasis.

Text on White Backgrounds (If applicable): #0A1B3F for headings, #333333 for body text.

3. Page Structure & Navigation

The new navigation menu should be:
Home | Learn | Impact | Contribute | About/Contact

4. New Feature Flows & Requirements

A. The "Contribute" Page

Navigation Flow: User clicks "Contribute" on the navbar -> Sees three distinct pathways (Trainer, Volunteer, Donor) -> Clicks one -> Fills out the respective form -> Sees a "Thank You" screen.

Trainer Pathway: Needs fields for Name, Email, Phone, School/College, “Why do you want to be a civic literacy trainer? (300 words)”, Availability (checkbox for 7 days of the week), and File Upload (for a resume or LinkedIn link/past teaching experience).

Volunteer Pathway: Needs fields for Name, Email, Phone, Availability, and Area of Interest.

Donor Pathway: Needs a clear call-to-action button linking to the existing payment gateway (will be shared later, yet to be set up).

Form Submission Destination: Submissions must sync to a shared Google Sheet.

Next Steps for Applicant: Upon submission, they must see a custom "Thank You" page on the site AND trigger an automated confirmation email to their address.

B. The "Learn" Section (Language Options)
Languages to Launch: English and Hindi (initially).

Content Scope: Translate everything on the Learn page (the menu titles, the page headings, the guides, and the educational articles). We want a seamless reading experience.

User Flow: User clicks "Learn" -> A dropdown or toggle appears to select "English" or "Hindi" -> Page reloads or dynamically updates text based on the selection.

C. The "Live Impact Tracker" Page
We want a public-facing dashboard displaying our metrics.

Required Sections:

Reach: Students trained, schools visited, cities covered.

Voter Registration: Forms submitted, roll confirmations.

Scholarships: Applications, ₹ value, disbursements received.

RTI: Filed, responses received, issues resolved.

Digital Safety: Cybercrime reports, scam complaints.

Financial Inclusion: Bank accounts, PAN applications, DigiLocker activations.

How it updates: Manually updated by Naisha’s team for now.
